My Ref :

To whom it may concern

I am writing to confirm that the following undergraduate students are currently conducting their Final Year Research Project under my supervision at the Sri Lanka Institute of Information Technology (SLIIT).

Project Title: AI-Powered Drone Based System for Comprehensive Coconut Tree Health Monitoring and Yield Prediction
Project ID: 25-26J-384

The project submitted by these students is their own original work, developed as part of their final year research project. To the best of my knowledge, the concept, design, and implementation of the product have been carried out by the students themselves under my supervision.

The students are:

1. IT22186638 – Subasinghe S M U
2. IT22266200 – Panditharathne R L
3. IT22898920 – Pasanjith W A R
4. IT22027788 – Karunarathne B G T N

I would also like to confirm that the project is currently in the final stage of development and is almost complete as part of their undergraduate research work. I further verify that this product is an original work developed by the students and is not copied from any existing system.

Please feel free to contact me if any further clarification is required.

Mrs. Uthpala Samarakoon
Senior Lecturer
